

ECM-S12X-070 Family of Controllers

Engine Control Module—Calibratable / Flash

Description

The ECM-S12X-070 family of engine control modules are rugged controllers capable of operating in harsh automotive, marine, and off-highway applications. The module and its connector system are environmentally sealed and suitable for engine mounting in many applications.

This unit provides 70 connector pins with inputs, outputs, and communications interfaces that support a wide variety of applications.

The ECM-S12X-070 is part of the MotoHawk Control Solutions ControlCore[®] family of embedded control systems. The ControlCore operating system, MotoHawk[®] code generation product, and MotoHawk's suite of development tools enable rapid development of complex control systems.

Each controller is available in 'F' (Flash) or 'C' (Calibratable) versions. Flash modules are typically used for production purposes. Calibratable modules are typically for prototyping/development only; they can be calibrated in real time using MotoTune[®].
